

# **10kW Mobile Energy Storage Container for Data Centers**

## Overview

---

Why do data center developers need battery energy storage systems?

As a result, data center developers are working toward innovative solutions to meet the growing energy demands of their facilities while also reducing their carbon footprint. Battery Energy Storage Systems (BESS) are emerging as a critical component of modern data center infrastructure.

Will Tesla Megapack batteries be used in data centers in 2025?

In this article, we explore the benefits, applications, and expected deployment of Tesla Megapack batteries for data centers in 2025. Understanding Tesla Megapack and Its Role in Data Centers Tesla's Megapack is a large-scale battery storage solution designed to store and dispatch renewable energy.

Why do data centers need utility-scale batteries?

Utility-scale batteries enable data centers to deploy a range of energy strategies, from speeding up interconnection timelines to managing seamless power source transitions and ensuring power quality as onsite energy portfolios evolve.

Why do data centers need energy storage?

**Backup Power:** In the event of an outage, BESS can provide backup power to keep data centers operational, minimizing downtime and data loss. As data center developers face the newer challenges of AI and the processing needs of larger applications, energy storage will play an increasing role in providing reliability and sustainability.

## 10kW Mobile Energy Storage Container for Data Centers
