What is 10 kV high-voltage pulse source simulation?

The 10 kV high-voltage pulse source simulation is built in MATLAB to verify the circuit principle and the prototype is built to verify the proposed topology. Ozone is a pungent smell of light blue gas with strong oxidation, which is widely used in air purification, ozone preparation and other fields.

What is a bipolar 10 kV 1 kW pulse power?

Part of the book series: Lecture Notes in Electrical Engineering ( (LNEE, volume 1408)) To meet the requirements of uniform and stable discharge plasma, high ionization efficiency and fast plasma diffusion, a bipolar 10 kV 1 kW high-voltage pulse power is designed with the adjustable amplitude and pulse width.

What is a boost high voltage nanosecond pulse generator?

Liang Yu. In the article, a new type boost high voltage nanosecond pulse generator is proposed. The nanosecond pulses with extremely high voltage gain. What's more, the isolation effect caused by the transmission line time delay is applied to achieve modular stacking.

Can a sic Buck-LLC converter generate a 10 kV high-voltage pulse?

This paper contributes that the SiC Buck-LLC converter is designed to generate the 10 kV high-voltage pulse in DBD applications. The proposed topology rising and falling edge is within 1  $\mu$ s, which can improve the high electron density and high oxygen atom production. Figure 1 is the proposed SiC Buck-LLC topology.
