

110kw inverter maximum access power

Overview

What is the maximum input voltage for a 40kW inverter?

The inverter has a maximum input current, such as 40A for 40kW. Only when the input voltage exceeds 550V, the output is likely to reach 40kW. When the input voltage exceeds 800V, the heat generated by the loss increases sharply, causing the inverter to derate the output.
