

120kW Energy Storage Container Protocol

Overview

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is BYD standard containerized Bess (battery energy storage system)?

BYD's Standard Containerized BESS (Battery Energy Storage System) provides our clients with the solution to solve quality, stability and availability issues. With over 15 years of technical research in energy storage system, BYD develops a series of standard containerized BESS according to different discharging span in 1, 2, 3 and 4 hours.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO4) combined with an intelligent 3-level battery management system (BMS);
