

## 12120A How many watts of inverter should be used

## Overview

---

What wattage should a solar inverter be?

The inverter wattage must be the same or greater than your solar panel's watts. Here is a chart that shows the watts consumption of various appliances and what inverter size you will need. Note that this guide includes a 20% safety margin for the inverter watts. This safety percentage can be adjusted.

How do I select an inverter that has enough power?

To select an inverter from DonRowe.com that has enough power for your application, add the watts for items you may want to run at the same time. Use the total wattage, plus 20%, as your minimum power requirement. Note: The wattage's given below are estimates. The actual wattage required for your appliances may differ from those listed.

How to size a solar inverter?

The right way to size an inverter is to check the wattage. The inverter wattage must be the same or greater than your solar panel's watts. Here is a chart that shows the watts consumption of various appliances and what inverter size you will need. Note that this guide includes a 20% safety margin for the inverter watts.

Do I need an inverter size chart?

The need for an inverter size chart first became apparent when researching our DIY solar generator build. Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly.
