

FTMRS SOLAR

# 15kw hybrid inverter for sale in Zambia

## Overview

---

Do Zambians know about solar inverters?

While generators have served private homes and organizations for many years, there is often the concern about sound and air pollution. Then came Inverters, solar systems, and then the recent hybrid known as Solar Inverters. While they are becoming increasingly popular, a lot of Zambians don't really know anything about it.

What are the different types of solar inverters?

There are three main types of solar inverters that you should know about. Stand-alone Inverters – these ones are used in isolation. Here, the inverter gets its power from batteries which are in turn charged by photovoltaic rays.

What is a solar inverter?

As stated earlier, a solar Inverter consists of a number of solar panels, electrical cable, batteries and the inverter compartment. The panels are often overlaid on the roof of the house for easy access to sun rays.

Does Zambia have a power problem?

For decades, all efforts (sincere or otherwise) that have been channeled towards improving power generation in Zambia have proved abortive. In fact, many believe the situation has worsened over time. Presently, the average Zambian home does not get more than six hours of electricity from the DISCOs on a daily basis.
