# 17 new energy charging stations in China and Africa

## Overview

---

Is China a leader in electric vehicle charging infrastructure?

As of 2023, China has established itself as a global leader in electric vehicle charging infrastructure. Here are some key statistics: Number of Charging Stations: Over 1.8 million public charging stations have been installed across the country. Fast Chargers: China boasts more than 500,000 fast chargers, the highest number worldwide.

Who is driving the expansion of EV charging stations in China?

Several key players are driving the expansion of EV charging stations in China. These include state-owned enterprises, private companies, and international collaborations. Some of the major players are: State Grid Corporation of China: The largest electric utility company in China and a major player in the EV charging market.

How many charging stations are there in China?

As of the end of May, the total number of charging stations across China reached a whooping 9.92 million, representing a year-on-year increase of 56 percent, Li Chao, a spokesperson for the National Development and Reform Commission (NDRC), China's top economic planning agency, said at a press conference on Tuesday.

Which country has the most EV charging stations in the world?

Fast Chargers: China boasts more than 500,000 fast chargers, the highest number worldwide. Growth Rate: The number of charging stations has been growing at an annual rate of 60%. The Chinese government has been proactive in promoting EV adoption through numerous initiatives and policies. Some of the most impactful include:

## 17 new energy charging stations in China and Africa

---

China overhauls EV charging: 100,000 ultra ...

Jul 9, 2025 · China plans 100,000+ public ultra-fast EV chargers by 2027, with solar, storage, and support for 800V fast-charging tech.

---

China's new energy technologies support green ...

CHANGSHA, June 15 (Xinhua) -- Green energy cooperation is a hot topic at the 4th China-Africa Economic and Trade Expo, which is taking place in central China from June 12 to 15. During ...

---

China leads world in charging infrastructure installation ...

Jun 18, 2024 · This impressive growth aligns with the flourishing new energy vehicle (NEV) sector in China, which is the world's largest market for NEVs. Both production and sales figures are ...

---

China builds world's biggest EV charging ...

Jun 19, 2024 · Charging piles for new-energy vehicles are seen in Jiaji town, South China's Hainan Province on August 22, 2022. Photo: cnsphoto ...
