

# **1MW Solar-Powered Container Bridge Application in South America**

## Overview

---

Is solar energy a viable alternative to electricity in South America?

In this way, the implementation of facilities for the generation of electrical energy through clean energy sources has been developed, with solar energy being one of the most attractive alternatives in the region. Table 9 shows a ranking of the countries in South America according to the criterion of installed capacity (MW).

What is installed capacity of solar PV & wind energy in South America?

Comparative evolution between solar PV energy, wind energy, and hydroelectric energy implementation in South America. Increasing installed capacity from 143,543 MW in 2013 to 179,685 MW in 2023. This is of installed capacity by 2023. In the case of onshore wind energy, installed capacity has.

What are the challenges facing solar energy implementation in South America?

According to Figure 17, it is shown that the main challenges facing the implementation of solar energy in South America are economic and political (EP) topics with 29% of repetitions. Then, with 26% of repetitions, we have the intermittent power supply (IPS).

What is Sunway ESS battery energy storage system (BESS)?

Sunway ESS battery energy storage system (BESS) containers are based on a modular design. They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects.
