

# 2500w24v inverter

## Overview

---

What is a 2500W 24V inverter?

Inverter 2500W 24V is 33% smaller than previous versions and is easy to mount even with minimal available space thanks to our unique PlugIn connector and cable system. Adding a remote control panel makes installation even more flexible. This model is available with an integrated transfer switch (Art. 709595).

What is a DEFA inverter 2500W 24V?

The DEFA inverter 2500W 24V is highly efficient, easy to install, and provides reliable 230VAC power with pure sine. It can handle all modern alternators, and double-peak output ensures that it can start heavy motorized equipment. It is fully compatible with the DEFA PlugIn system, and you can easily install several 230V outlets in your vehicle.

Can a 2500W 24V inverter be operated from a remote control panel?

Inverter 2500W 24V can be operated from a remote control panel (Art. 709340 - must be ordered separately). The panel makes installation of the inverter more flexible since it can be mounted in locations where it's not easily accessible. Because of the high current required to create 230VAC, inverters need fans to help prevent overheating.

How many Watts Does a 2500 watt inverter need?

Total Load Watts = 700 Watts + 125 Watts + 1500 Watts = 2325 Watts. In this case, a 2500 Watt inverter or higher is required. It would need to be 24 Volts. For details on how to calculate your solar power, see Renogy Solar Calculators. For wiring lengths and gauge sizing, please reference Fuses and Wire Gauge.
