Can a solar power system save CO2 in cement industry?

Concentrated solar power system is designed for cement industry. Substitution of required thermal energy ranging from 100% to 50% is studied. 7600 heliostats with 570 ha land required for 50% conventional energy replacement with solar energy. Selected conventional cement plant could save 419 thousand tons of CO 2 annually.

What is a 2mwh energy storage system (ESS) & 1MW solar energy?

PVMARS's 2MWh energy storage system (ESS) + 1MW solar energy is an off-grid microgrid solution. Solar panels themselves cannot store a lot of electricity, so the system uses photovoltaic panels to generate electricity during the day. It delivers power to your electrical equipment through the PCS and enables the ESS to store excess solar power.
