### 3 2v solar container lithium battery energy storage

## Overview

---

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

What is container energy storage battery ESS integrated system?

3.29MW Container Energy Storage Battery ESS Integrated System This Energy Storage System is highly integrated with lithium battery, battery management system, PCS, grounding system, power distribution system, temperature control system and fire protection system.

What is energy storage system?

This Energy Storage System is highly integrated with lithium battery, battery management system, PCS, grounding system, power distribution system, temperature control system and fire protection system. The AC voltage is 1305VDC, which can provide peak and valley filling, grid frequency adjustment, power expansion and backup.

How does the energy storage system work?

These components work together to ensure the safe and efficient operation of the container. The capacity of cell is 306Ah, 2P52S cells integrated in one module, 8 modules integrated into one rack, 5 racksintegrated into one container. As the core of the energy storage system, the battery releases and stores energy
