30 kW solar powered water pump

Overview

What is a 30 kW solar pump inverter?

Three-phase DC/AC 30 kW solar pump inverter, compatible with solar panels and asynchronous motors, advanced MPPT technology applied to the irrigation system. Performs normally under vibration acceleration up to 5.9m/s² (0.6g). No condensation when the RH (Relative Humidity) is less than 95%.

What makes a good solar water pump inverter?

Good-quality 30 kW solar water pump inverter has high-density ventilation ports for excellent cooling, ensuring stable operation in high-temperature environments. The powerful DC heat sink operates quietly, effectively reducing the heat generated during inverter use, with intelligent start-stop control.

What are solar energy-powered water pumps?

Solar energy-powered water pumps are water pumps running on the electricity that is generated by solar energy. For generating solar power, solar photovoltaic (PV) systems are used for complementary energy sources, they are deployed alongside diesel pumps in areas with plenty of sunshine and where the cost to run power lines is high.

How much power does a solar pump inverter have?

Economic 30kW 40 hp solar pump inverter, AC output 60A at 3-phase, DC voltage range (280V, 750V).
