

# **30kW Off-Grid Solar Container for Highways**

## Overview

---

What is an off-grid 30kW Solar System?

An off-grid 30kW solar system consists of solar panels, a solar inverter, and a battery among other necessary gadgets. The battery, which is sufficiently powerful to run up to 24 kW load, stores the extra power generated by the solar panels to make it useful in the future.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

Where is harvested energy stored?

Harvested energy is stored in Lithium LiFePO<sub>4</sub> battery banks with its own programmed BMS (Battery Management System).

What is a solar power generator?

A silent, worry-free alternative to loud and dirty diesel generators to meet high off-grid power needs using solar power generation – with optional wind turbine (s) for augmented power generation day and night. Harvested power stored in a choice of batteries including Lithium Ion, EV Second Life Batteries, and deep-cycle AGM batteries.

## 30kW Off-Grid Solar Container for Highways
