What are the most popular solar-plus-storage developments in Africa?

As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2023 (pictured above).

How has energy storage changed in 2022?

This has resulted in an increase in energy storage levels in recent years. In 2022, the continent had around 50MWh of energy storage capacity installed. Since then, energy storage capacity tripled in 2023 and then experienced another 10-fold increase in 2024. Image: AFSIA Solar.

How can energy storage help fill the short-term supply gap?

The report notes this initiative, which is described as a means to fill the short-term supply gap, alleviate the electricity supply constraints, and reduce the extensive utilisation of diesel-based peaking electrical generators. Several initiatives and drivers for energy storage have also been introduced to African countries.
