

350kW Japanese folding container used in fire stations

Overview

What is a firefighter storage container?

Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs.

Can you use shipping containers to build custom firefighter training structures?

Here's a few benefits in using shipping containers to build custom firefighter training structures. Using shipping containers for firefighter training is probably the most cost-efficient option there is. Used shipping containers are low-cost to purchase and can be modified in any way the fire department sees fit.

What size shipping container for firefighter training?

Shipping containers for firefighter training are normally 40-foot containers, but you can also utilize 20-foot containers if you prefer a smaller structure. Many fire departments choose to stack and weld 40-foot containers on top of one another to create multi-story buildings with multiple corridors, rooms, and windows.

Do fire departments use shipping containers?

Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs. By doing this, fire departments can simulate a real-life fire by using modified shipping containers meant to resemble a real burning building.
