

FTMRS SOLAR

# 40-foot solar-powered container for aquaculture available now

## Overview

---

Shrimpbox is a 40-foot-long cargo container containing a shrimp farm in an AI-powered, automated system where everything can be operated remotely. How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

What is a 20 & 40 ft shipping container?

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats.

What is a container farm called The Greenery?

The Greenery is a next generation container farm enabling local, hydroponic food production anywhere in the world. Developed by Freight Farms—the company that created the world's first container farm—The Greenery packages the most advanced indoor growing technology into a modular 40-foot shipping container.
