50kw sunsynk inverter factory in Finland

Overview

What is a sunsynk 3 phase 50kW hybrid inverter?

The Sunsynk 3-Phase 50kw Hybrid inverter is a highly efficient power management tool that allows the user to hit those 'parity' targets by managing power flow from multiple sources such as solar, mains power (grid), and generators, and then effectively storing and releasing power as and when utilities require.

How efficient is a sunsynk inverter?

The CT coil measures the power and the inverter will reduce power when too much power is detected going to the grid. Even better, if the Sunsynk inverter only has 2000W of excess solar, the element will receive the other 200W from the grid. So it is efficient.
