

## **50kw using two inverters**

## Overview

How to connect 50kW hybrid inverters with batteries in parallel?

Here is the guide on how to connect 50kW Hybrid Inverters with Batteries in Parallel. First note - Each 50kW Inverter MUST have it's own HV Battery pack, unlike cases of other hybrid inverter with LV battery, HV battery can only be connected separately to HV hybrid inverters.

Should you connect two solar inverters in parallel?

**Increased Power Output** By connecting two solar inverters in parallel, you significantly boost the system's total power capacity. For example, two GA5548MH inverters in parallel will provide 11kW of total power—ideal for applications requiring high power output. **Enhanced Reliability** A solar inverter parallel connection offers redundancy.

How do I install a 50kw inverter?

Please refer to the Manual on installing the 50kW unit along with the Battery rack. Step 1 - Once you have the inverter connected to the Battery, AC and PV, we will need to link up the 50kW Inverters using a patch cable that goes from the Master inverter, to the second Inverter and so on.

Does a 50kw inverter need a battery pack?

First note - Each 50kW Inverter MUST have it's own HV Battery pack, unlike cases of other hybrid inverter with LV battery, HV battery can only be connected separately to HV hybrid inverters. For example, Inverter 1 must have a battery rack connected into BMS 1, then the Second Inverter has a separate Battery rack into that inverters BMS 1.
