5kwh battery storage in China in Mexico

Overview

Will Mexico colocate battery energy storage systems?

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the Senate on Tuesday.

How will battery storage impact the energy system in Mexico?

As Mexico establishes itself as a regional renewable energy hub, we expect battery storage to become an essential means for enhancing the flexibility of its grid system to provide more versatile energy delivery across the country.

Does Mexico have a 30% energy storage mandate?

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028.

Should energy storage be mandated in China?

Regulations introducing an energy storage mandate first appeared in China. Since 2022, policy mandates requiring solar and wind energy projects to include energy storage systems have been crucial in the acceleration of storage deployment in the world's market.
