

6KW 48V inverter

Overview

What is the inverter Rs smart solar?

The Inverter RS Smart Solar is a combination of a powerful 48VDC, 6kVA 230VAC inverter and a high-voltage, 80–450VDC, 4kW MPPT solar charger, designed for off-grid solar systems.

What is a 36kw inverter?

The 36kW is an extension of the existing 23kW and 28kW inverter line and features a dual MPPT design with up to 98.6% conversion efficiency and wide operating window of 240-950Vdc. An installer friendly and integrated wire box simplifies installation and reduces BoS costs.

How much does a victron inverter weigh?

Thanks to its modern design and high-frequency technology, the inverter weighs only 11 kg and offers excellent efficiency, low standby consumption, and very quiet operation. It features a built-in display to show battery, inverter, and solar charger data. These parameters can also be viewed via Bluetooth using the VictronConnect app.

Is a 6 kW inverter worth it?

The combination of these two things means that it's probably not worth your while having a system at 6 kW. A 5 kW inverter will be the most cost effective. And the extra 1 kW of panels means that you'll get best use out of your inverter - it will spend more time running at its peak output.
