# FTMRS SOLAR

# 80W solar panel self-operated

## Overview

What is an 80 watt solar module?

An 80 watt solar module is a high efficiency monocrystalline solar module, as in the GP-PV-80M Solar Module from Go Power!, which provides outstanding performance and cost-effective solar power for residential, commercial and industrial applications.

How many watts does an 80W solar panel produce?

So you need a 80 watt solar panel. Its mean, you need 480 watts for 4 hours where 80W solar panel will produce 480 Watts as sunshine is 6 hours. To know the battery bank, inverter and charge controller size for this system, see the link in the foot-note. Key Point: The above calculations are based on Ideal case.

What devices can be powered by an 80W solar panel?

An 80W solar panel can power notebook computers, smartphones, and other small devices. However, it is not sufficient for appliances like refrigerators, microwaves, and washing machines.

What is a GP-pv-80M solar module?

The GP-PV-80M Solar Module from Go Power! is a high efficiency monocrystalline solar module that provides outstanding performance and cost-effective solar power for residential, commercial, and industrial applications. It features a 25-year limited power output warranty and is built to last.
