.

Why are glass curtain walls a popular design in modern high-rise buildings?

At the same time, glass curtain walls are a popular design in modern high-rise buildings, because they are not only beautiful but also use natural lighting to reduce lighting energy consumption.

Can a double-layer curtain wall improve indoor thermal comfort?

In terms of improving glass structure, Xiangfei Kong et al. adopted a double-layer curtain wall with natural air circulation and louvre system to optimize indoor thermal comfort by changing air circulation and adjusting the shading curtain's angle and installation position, however, this design allows the chamber to overheat in summer.

How can a glass curtain wall save energy?

Due to the low ambient temperature in spring and autumn working conditions, ventilation for glass curtain wall can reduce the inside temperature significantly, it can save 179 Wh of electric energy one day. 6. Conclusion
