# American Energy Storage Explosion-proof Fan Product Parameters

## Overview

---

Are ration venting protection systems NFPA 68 compliant?

ration venting protection systems in accordance with NFPA 68. While these codes have been successful in providing regulation to BESS, they are not always sufficient or up to date in addressing some specific challenges of BESS deflagration control, as BESS are rapidly evolving and diversifying.

What is a bs&b explosion vent?

Explosion Venting Protection for Battery Energy Storage SystemsBS&B manufactures Ven -SafTM explosion vents for Battery Ene / deflagration event caused by thermal reactions from release andcontainer to safely move the explosion upward and away from t e container. BS&B vents are certified to open at designated burstig.

What is NFPA 68?

as ventilation and explosion prevention requirements.NFPA 68NFPA 68 Standard on Explosion Protection by Deflagration Venting addresses the installation and use of devices and systems that vent combustion gases and pressures resulting from a deflagration within an enclos.

What if a vent panel is actuated in a deflagration or explosion?

come projectiles in the event of a deflagration or explosion. The angle of vent panel openings upon actuation also need to be considered, as different angles allow more or less oxygen to enter the enclosure while still retaining the flammable gas and heat within,
