# Amsterdam energy storage power station is profitable

## Overview

---

Is the Netherlands a good market for battery storage?

The Netherlands is an emerging market for battery storage but, due to the lack of saturation, also a highly exploitable one. In early 2025, enspired, together with Flexcity and S4 Energy, reached an exciting milestone by taking the country's first 4-hour BESS live in a cross-market optimization setup.

What are the economic opportunities for Bess assets within a Dutch electricity market?

We highlight the economic opportunities for BESS assets within one of the Dutch electricity markets in this article. The Dutch electricity market is undergoing a significant shift towards renewable energy, primarily solar, wind, and other sustainable sources.

Will Amsterdam become a sustainable port by 2030?

Starting October 2024, the implementation organisation "Energy for the City" (Energy voor de Stad) will lead the city's energy transition efforts to meet this target. The Port of Amsterdam is leading the way to becoming one of Europe's most sustainable ports by 2030.

What is a battery energy storage system (BESS)?

The Dutch electricity market is transforming with increased solar, wind and other renewable power, creating opportunities and challenges. Battery energy storage systems (BESS) are vital for managing market volatility and capitalizing on price fluctuations.
