## Overview

---

Why is Thailand launching 5g-a & 6G?

By making these frequencies available, Thailand aims to advance telecommunications infrastructure to support the development of 5G-A and set the stage for future 6G systems. The current licences for the 2.1 GHz and 2.3 GHz bands, held by NT, will expire in September 2025.

Is 5G a roadmap for success in Thailand?

**ACCELERATING 5G AND 5G-ADVANCED IN THAILAND: A ROADMAP FOR SUCCESS** The key challenge is the current use of the extended C-band (3.4–3.7 GHz) and standard C-band (3.7–4.2 GHz) frequencies for satellite services in Thailand, as there are an estimated 10 million or more TVRO services in operation, according to the NBTC.

How many 5G connections are there in Thailand in Q2 2024?

In Q2 2024, 26.6% of connections were 5G connections and 5G coverage reached 95% of the population.<sup>2</sup> Mobile data traffic per connection in Thailand is among the highest in ASEAN. Yet, more work is needed to ensure there are sufficient spectrum resources to support the next phase of 5G development, especially in the crucial mid-band range (1–7 GHz).

When will 5G technology be implemented in Thailand?

The roadmap mentions the development of 5G technology “and beyond”, and while the 2-Year Action Plan for Promoting the Adoption of 5G Technology in Thailand (2021–2022) has already been announced, phase 2 of the plan (2023–2027) remains under development.<sup>37</sup> It is expected to be completed by the end of 2024.<sup>38</sup> 33.
