

Base station waterproof distribution box requirements

Overview

Are selhot power distribution boxes waterproof?

SELHOT's plastic power distribution boxes (plastic distribution boards) are impact and oxidation resistant, making them ideal for use in waterproof and dustproof environments.

Why do you need a plastic distribution box?

These distribution boxes ensure reliable electrical distribution and protection in challenging conditions, safeguarding equipment and ensuring continuous operation. Plastic distribution boxes are space-saving, safe to operate, easy to disassemble and install, and have IP66 level waterproof and dustproof performance.

Are plastic distribution boxes safe?

Plastic distribution boxes are space-saving, safe to operate, easy to disassemble and install, and have IP66 level waterproof and dustproof performance. We can customize plastic distribution board according to the individual needs of customers.

Why should you choose a waterproof distribution board?

We can provide customization options in the design details, including product color, product material, opening position and so on. Weatherproof distribution boards are suitable for protecting electrical components from damage in the event of a system failure or short circuit.
