# **Battery Cabinet Operation Specifications**

## Overview

---

What temperature is the battery cabinet rated for?

The battery cabinet is rated for operation in up to a 40°C (104°F) ambient temperature. The batteries are rated for a 25°C (77°F) ambient temperature to extend their useful life. It is recommended for optimal battery life and discharge performance to keep the ambient air temperature the battery is used in at 25°C (77°F).

What are the safety requirements for a battery cabinet?

- The battery cabinet must be properly earthed/grounded and due to a high leakage current, the earthing/grounding conductor must be connected first. Failure to follow these instructions will result in death or serious injury. Battery Safety DANGER.

What are the battery cabinet external wiring requirements?

The battery cabinet external wiring requirements are shown in Tables D and E. NOTE 1:1All specified wire sizes are 90 C rated copper minimum. NOTE 2:Replace with same type and number of original battery. Mixing battery letter designation and or sizes will damage equipment and void warranty.

What is a battery cabinet?

The battery cabinet is designed for industrial or computer room applications and should be handled with appropriate care. This battery cabinet contains LETHAL VOLTAGES. All repairs and service should be performed by AUTHORIZED SERVICE PERSONNEL ONLY. There are NO USER SERVICEABLE PARTS
