Battery life of Guyana base station energy storage

Overview

What is Indch4's backup battery energy storage system?

LNDCH4, the U.S. joint venture building an integrated natural gas processing facility at Wales, announced on Friday the arrival of a 30-megawatt backup battery energy storage system (BESS), a critical safeguard designed to ensure uninterrupted power delivery from the country's landmark Gas-to-Energy project.

What is the backup battery storage system?

LNDCH4 Guyana is pleased to announce the arrival of the Backup Battery Storage System (BESS) which landed at the John Fernandes wharf today. The BESS forms a critical part of the power plant's emergency support system and is engineered to ensure uninterrupted energy delivery in the event of turbine failure.

What is a Bess & how will it impact Guyana?

The arrival of the BESS follows the earlier delivery of two gas turbines, each capable of generating 45 megawatts of electricity. Together, these components are expected to enhance the reliability of Guyana's national grid, reduce carbon emissions, and support the delivery of more affordable electricity.
