

FTMRS SOLAR

Bess system for solar factory in Portugal

Overview

Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar power plants near Alcoutim, a small village in the country's sunny southern region of the Algarve, where Galp operates several projects with a combined capacity of 144 MW. Who is constructing a Bess project in Portugal?

A 5MW/20MWh BESS project Powin and Hitachi deployed for Galp in Portugal. Image: Powin / Hitachi / Galp. Oil, gas and renewables firm Galp has announced construction on BESS projects in Spain and Portugal using equipment from inverter and BESS firm Sungrow.

What is a 5mw/20mwh Bess project?

A 5MW/20MWh BESS project Powin and Hitachi deployed for Galp in Portugal. Image: Powin / Hitachi / Galp. Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy.

Where will Galp install a Bess solar PV plant in Spain?

In Spain, Galp will install a 14MW/28 MWh BESS at a solar PV plant in Manzanares, in the Castilla-La Mancha region. The operation and optimization of the BESS projects will be directed by Galp's Control Center, a dispatch centre approved by REN and REE, in Portugal and Spain, respectively.

What is Bess technology & how does it work?

The centre centralises real-time management of photovoltaic parks, energy storage units and industrial consumption, maximising the value of the energy produced, Galp said. The BESS technology is being provided by China-based firm Sungrow, specifically its PowerTitan 2.0 solution. The projects will include grid-forming inverters.
