Budapest BESS solar container outdoor power

Overview

Where is Hungary's largest battery energy storage system located?

Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Százhalombatta, located close to Budapest. The new facility boasts a total power output of 40 MW and a storage capacity of 80 MWh.

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Does Hungary have a regulatory framework for co-located Bess projects?

Historically, Hungary's regulatory framework did not provide clear guidelines for the integration of co-located BESS projects. This lack of specific regulation created uncertainty for investors and developers, hampering the widespread adoption of these energy storage solutions.

Does Hungarian law support co-located Bess systems?

While the concept of electricity storage was introduced into Hungarian law earlier, comprehensive policies to support the deployment of co-located BESS systems were lacking.
