Central Asia New Energy Small Container Line Station

Overview

How does the Central Asia – China pipeline work?

From the first compressor station, natural gas along the Central Asia – China pipeline travels 1833 km eastward for 84 hours, passes through the central part of Uzbekistan, the southern part of Kazakhstan and enters China through the border checkpoint Khorgos, enters the second and third lines of the West-East gas pipeline.

How many lines are in the China-Central Asia natural gas pipeline network?

Currently, the China-Central Asia natural gas pipeline network has three lines in operation, namely Line A, B and C, while Line D is under construction.

Why is the Central Asia-China gas pipeline important?

For over 14 years, the Central Asia-China gas pipeline has been a vital conduit for clean energy, delivering over 500 billion cubic meters of natural gas to China, Chinese media reported, citing the West Pipeline Company of the Chinese PipeChina Corporation.

How much money does China invest in Central Asian countries?

By 2024, China's direct investment stock in the five Central Asian nations surpassed \$17 billion, with cumulative project turnover in sectors like infrastructure, new energy, and oil and gas extraction exceeding \$60 billion. However, we will focus here on cooperation between China and Central Asian countries in sustainable development.
