# China Energy Storage Cabinet Battery Production

## Overview

---

Is China a leader in battery energy storage?

China has been an undisputed leader in the battery energy storage system deployment by a far margin. The nation more than quadrupled its battery fleet last year, which helped it surpass its 2025 target of 30 GW of operational capacity two years early.

Why is China's battery industry growing so fast?

The rapid growth is guaranteed by China's strong battery manufacturing capability. Last year, a new energy power and energy storage battery manufacturing base with an annual production capacity of 30 GWh, constructed by China's battery giant Contemporary Amperex Technology Co., Ltd. (CATL), went into operations in Guizhou Province.

Does China have a market advantage for battery storage systems?

ds, and service networks for battery storage systems. At present China does have some market advantages when it comes to the development of BESS infrastructure, including the supply chain related to global lithium-ion battery production.

Will Guizhou become a new energy storage center in 2025?

By 2025, Guizhou aims to develop itself into an important research and development and production center for new energy power batteries and materials. Recently, China saw a diversifying new energy storage know-how. Lithium-ion batteries accounted for 97.4 percent of China's new-type energy storage capacity at the end of 2023.
