# China solar power to battery in Qatar

## Overview

---

Where is Qatar's first solar power plant?

Qatar's first solar power plant, built by Chinese companies, was put into operation on Tuesday, marking a milestone for the country in energy transition. The 800MW Al Kharsaah Solar Power Plant, located in the desert area about 80 kilometers west of its capital Doha, is one of the largest in the Middle East.

Who makes solar energy in Qatar?

The state-owned group, Qatar Solar Energy, is a leading manufacturer of solar power components and last year opened the largest integrated production facility for solar energy systems in the Middle East and North Africa region. Even more recently, Qatar's Solar Technologies, took a 49% stake in German-based SolarWorld.

Does Qatar have solar energy?

The climate of Qatar lends itself to solar energy generation, although as a geographically small state it lacks the vast expanse of desert available for solar farms in neighbouring states.

How much Chinese equipment is used in Al Kharsaah solar power plant?

"Chinese equipment was applied throughout the project's 800 MW photovoltaic area, which makes up more than 60 percent of the total investment," said Li Jun, on-site construction manager of Al Kharsaah Solar Power Plant.
