

# **Colombia Hydroelectric Energy Storage Station**

## Overview

---

How many hydro power plants are there in Colombia?

Colombia generates hydro-powered energy from 12 hydro power plants across the country. In total, these hydro power plants has a capacity of 6694.0 MW. What is hydropower?

Hydropower, also known as hydroelectric power, is a form of renewable energy that generates electricity by harnessing the power of moving water.

Is Colombia's hydropower project a threat to energy security?

Likewise, the 2,400MW Ituango Hydroelectric Project in Colombia – South America's largest ongoing hydropower scheme – has only recently begun phased commissioning amid significant technical and social challenges, yet its full capacity will be critical for the country's energy security once all turbines are online.

How many MW does a hydro power plant have?

In total, these hydro power plants has a capacity of 6694.0 MW. What is hydropower?

Hydropower, also known as hydroelectric power, is a form of renewable energy that generates electricity by harnessing the power of moving water. It involves the conversion of the energy in flowing water into electrical energy using turbines and generators.

Which hydro power plant is being built in 2024?

In 2024 the 44.5MW Khobi-2 hydropower project was commissioned, and the 22.4MW Kaspi Hydro Power Plant was announced and is set to be built on the Mtkvari River in the Kaspi Municipality. Construction work to recommission the 160MW pumped storage plant at Happurg is underway, just months after plans were announced by Uniper in mid-2024.

## Colombia Hydroelectric Energy Storage Station
