

# Comparative Test of Automated Photovoltaic Container Type in Cambodia

## Overview

---

Why are Cambodians investing in solar energy?

Cambodian households and businesses are also increasingly investing in behind-the-meter (BTM) solar energy systems as they're much easier and faster to deploy and costs are lower than utility grid rates, market analysts highlight. Photovoltaic electricity potential in Cambodia. © 2017 The World Bank, Solar resource data: Solargis.

Can solar power help Cambodia achieve national electrification goals?

Searching for alternative options, Cambodia joins a growing list of national governments who have come around to seeing solar and other distributed, emissions-free renewable energy resources as a cost-effective means of achieving national electrification, as well as national and international climate change and renewable energy, goals.

What is Cambodia national solar park?

Project Background and Description: The Cambodia National Solar Park has a total capacity of 100 MW and it aims to incentivize the development of solar energy in Cambodia.

How many solar power plants are there in Cambodia?

Just two solar power plants are up and running in Cambodia at present, one a 10-MW plant developed by Singapore's Sunseap and another, 60-MW facility in Kampong Speu. Cambodia consumed a total of 2,650 megawatts of electricity in 2018, an increase of about 15% compared to 2017, according to the Ministry of Mines and Energy.
