Construction of Boston integrated energy storage power station

Overview

What are the largest battery energy storage projects in New England?

Cranberry Point and Cross Town are the largest battery energy storage projects in construction with planned operations in New England and are expected to be online by the summer of 2025. The Cross Town Energy Storage project commenced construction in April 2024 and is now the largest battery coming online in the region, Plus Power said.

Does ISO New England have a battery storage facility?

ISO New England welcomes first major utility-scale standalone battery storage facility A rendering of the Cranberry Point Energy Storage project (Credit: Plus Power).

What are battery storage power stations?

Battery storage power stations are usually composed of batteries, power conversion systems (inverters), control systems and monitoring equipment. There are a variety of battery types used, including lithium-ion, lead-acid, flow cell batteries, and others, depending on factors such as energy density, cycle life, and cost.

Is ISO New England planning a 300MW Bess in Boston?

System operator ISO New England has given the go-ahead for a 300MW/1,200MWh indoor BESS located in Boston, Massachusetts under development by developer and IPP Flatiron Energy. ISO New England approved a proposed plan application associated with the project in the form of a letter published on the system operator's website on 6 January, 2025.
