

# **Construction of solar container communication station inverters in public places**

## Overview

---

What is a proinsener solar inverter station?

Proinsener Solar inverter stations are designed and integrated specifically for each project. It is an easily installable and compact product perfect for generating solar power on a large scale. All this allows easy and quick field connection to the medium voltage transforming station (MV), which reduces transport and installation costs.

How a photovoltaic inverter station works?

In each inverter station all of the necessary equipment is integrated to connect to the medium voltage network of the photovoltaic plant, always complying with the standards of performance and quality required according to the project and its location.

What is MV-inverter station?

highlight of this chain is the MV-inverter station, which comprises the switchgear, transformer, and inverter. With its broad portfolio of switchgear, Siemens offers the right solution for any application – reliable and maintenance-free, for any climate.

What is an ABB inverter station?

The ABB inverter station design capitalizes on ABB's long experience in the development and manufacture of secondary substations for electrical authorities and major end-users worldwide in conventional power transmission installations. The station houses two ABB central inverters and embedded auxiliary power, monitoring and air filtration systems.
