

Copenhagen wind farm energy storage

Overview

What are the wind turbines in Copenhagen?

Coastal wind turbines at the oceanic windmill Middelgrunden, situated just outside Copenhagen. These iconic turbines, which can be seen from most places within this capital city, are a symbol of a future with green cities and sustainable energy in Denmark. These wind turbines were some of the first of shore in Denmark.

What is the largest offshore wind farm in Denmark?

The first large offshore wind farm built in Denmark according to Eltra specifications is the Horns Rev wind farm. This wind farm has a 160 MW rated power capacity and it consists of 80 Vestas V80-2 MW variable-speed wind turbines with doubly fed induction generators (DFIG).

How do we develop offshore wind?

We are developing offshore wind all the way from site screening through the construction and into operation. We typically bring in a partner during the late development phase of the project and divest fully at project level at Final Investment Decision.

How do wind power projects work?

The projects are constructed with strong foundations to withstand the forces of nature while efficiently capturing the power of the wind at seas. After commissioning and achieving commercial operation, the project transitions into operation.
