

# **Cost of 100kW Photovoltaic Containers in African Ports**

## Overview

---

How much does solar PV cost in Africa?

On-grid commissioned and planned utility-scale solar PV projects between 2014 and 2018 in Africa range from around USD 1.2 to USD 4.9/W (USD 1 200 to 4 900/kW). Although Africa is currently home to a very small set of utility-scale solar PV projects, costs have been declining over time.

What is the average solar PV system capacity in Africa?

The average residential solar PV system in OECD countries has a capacity of 3 to 5 kW. SHS in Africa can be 60 to 250 times smaller, with a typical capacity of 20 to 100 W. In addition to having higher costs per watt due to their small size, these systems need to incorporate batteries and charge controllers.

How much does a solar PV mini-grid cost in Africa?

Stand-alone solar PV mini-grids or solar PV-hybrid mini-grids have installed costs in Africa ranging from USD 1.9 to USD 5.9/W for systems greater than 200 kW. Solar PV mini-grids that came online in 2012 or earlier have higher costs.

Are solar PV systems becoming more common in Africa?

Source: World Bank, 2016. With an expanding market for the installation of solar PV systems in Africa, it naturally can be expected that companies which produce solar PV modules locally will emerge and become more common.
