Custom 20-foot solar container in Australia

Overview

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

Can a shipping container building be powered by an off-grid Solar System?

Yes. We offer an off-grid solar solution to power your shipping container building. We also use a screw piling system when securing it to the ground. Screw piles eliminate the need for a concrete slab and are suitable for any terrain, including sloping or uneven ground.

What are the advantages of a container roof solar system?

1. Integrated Solar Array High-efficiency solar panels installed on the container roof or fold-out frames.
2. Battery Energy Storage Lithium-ion or deep-cycle batteries store energy for use day or night.
3. Inverter & Control Systems Converts solar power to usable electricity with smart monitoring.
4. Weatherproof & Secure
