Customized UPS uninterruptible power supply

Overview

What is UPS (uninterruptible power system)?

UPS (Uninterruptible Power System), that is, uninterruptible power supply, is a constant voltage and constant frequency uninterruptible power supply with energy storage devices and inverters as the main component.

Which is the best uninterruptible power supply manufacturer?

With 20 years of R&D experience in UPS industry, SCU, one of the biggest uninterruptible power supply manufacturers, provides 6KVA to 900KVA UPS products that are highest levels of availability, reliability and efficiency. SCU UPS products cover applications from IT rooms to large data centers and industrial plant and so on.

What is an uninterruptible power supply?

A uninterruptible power supply (also called UPS, from the English Uninterruptible Power Supply) is an apparatus used to constantly keep electrically powered alternating current loads. It is necessary when the electrical equipment can not under any circumstances remain without power supply, thus avoiding a malfunction.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.
