# Czech Solar Systems

## Overview

---

How many solar power plants are in Czechia?

A total of 82,799 solar power plants were connected to the grid in Czechia last year. Image: CEZ Group Czechia recorded a significant increase in installed solar capacity last year, with about 970MWp of capacity added to the grid. However, the growth was mainly driven by household rooftop solar, according to the Czech Solar Association.

How many solar parks are there in the Czech Republic?

There were 500 solar parks with a capacity of over 1 MWp. During 2022, the number of installations rose to almost 85,000 PV plants with a total capacity of 2,460 MWp. The development of wind energy in the Czech Republic also continues apace.

Will the Czech Republic invest in solar power?

The Czech Republic will have hard time looking for someone willing to invest in the sector," the Czech Solar Association Chairman Jan Krcmar said. Majority state-owned electricity producer CEZ (CEZP.PR) plans to invest \$4.15 billion - four times its 2020 profit - into building 6 gigawatt of solar power capacity by 2030.

What is the largest CEZ Group photovoltaic power plant?

The largest CEZ Group photovoltaic power plant is Ralsko with an installed capacity of 55.7 MW. The group of photovoltaic installations known collectively as FVE Ralsko and located kilometers apart from each other is located in the territory of the former military area, which would hardly find an alternative use.
