

# **Czech portable power research and development**

## Overview

---

What are the strategic energy priorities of the Czech SEC?

The Czech SEC contains strategic energy priorities, i.e. (i) a balanced energy mix/transformation of the energy industry; (II) energy savings and energy efficiency improvements; (III) infrastructure development; (IV) energy and industrial research, human resources; (v) energy security.

How can the Czech Republic improve the energy system?

Hydrogen production in the Czech Republic can help with the regulation of the electricity system by making efficient use of the surplus of energy generated. 8) Finally, “last mile” will be needed, especially for heavily decarbonised sectors, the use of carbon storage technology and use. By 2050, the scenario envisages a total volume of 18 Mt.

What is the long-term vision of the Czech Republic's energy sector?

The long-term vision of the Czech Republic's energy sector is a reliable, affordable and sustainable supply of households and the energy economy in the long term. The vision thus defined is summarised in the three top strategic energy objectives of the Czech Republic, which are security – competitiveness – sustainability.

Can Poland achieve energy sustainability compared to the Czech Republic?

The study's research hypothesis states that Poland, despite the greater challenges posed by CO<sub>2</sub> emissions and higher energy consumption, can achieve a level of energy sustainability comparable to that of the Czech Republic through dynamic investments in renewable energy sources and improvements in energy efficiency.
