

# Desert Solar Energy Storage Station

## Overview

---

Is the desert a hotbed for solar?

This corner of the desert is a hotbed not only for solar but also for wind energy. Rows of wind turbines, connected by both straight and sinuous access roads, are visible in the stretch of desert northwest of the solar-plus-storage project (above).

What is Edwards Sanborn solar & energy storage?

The Edwards Sanborn Solar and Energy Storage project incorporates the highest capacity solar farm in the United States with the largest battery storage system in the world. The facility came online in February 2023 and became fully operational in January 2024.

Where are solar-plus-storage wind turbines located?

Rows of wind turbines, connected by both straight and sinuous access roads, are visible in the stretch of desert northwest of the solar-plus-storage project (above). This image was also acquired by the OLI-2 on Landsat 9 on January 12, 2024.
