

# **Do owners have the right to block outdoor solar container communication station inverters**

## Overview

---

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Are solar inverters safe?

U.S. experts uncovered the components during security inspections of renewable energy equipment, prompting a reevaluation of the risks posed by these products. Inverters, critical for connecting solar panels and wind turbines to the power grid, are predominantly manufactured in China, amplifying concerns about their security.

Are hidden communication devices in Chinese-manufactured solar panels a threat?

Recent findings have uncovered hidden communication devices within Chinese-manufactured solar panels, sparking serious concerns over the security of national power grids.
