

# Does Mexico have 5G solar container communication stations

## Overview

---

Does Mexico have a 5G network?

The share of 5G mobile connections in Mexico, the second economy in the region, is expected to exceed 60 percent by 2030, despite the significant infrastructure and economic challenges encountered since the introduction of 5G in the country. Log in or register to access full data.

What is the first commercial 5G network in Mexico?

Together with Telcel, we're launching the first commercial 5G network in Mexico—the largest in Latin America so far—reaching 15 cities in the country with more than 1,500 radio base stations.

Is 5G available in Mexico in 2024?

In 2024, 5G is available in almost half the 31 states of Mexico, in which Telcel is the predominant actor throughout the existing 4G frequencies. While 5G is being rolled out in Mexico, the focus is currently on Non-Standalone (NSA) 5G. This means that the initial 5G deployments rely on the existing 4G LTE core network infrastructure. 2.

Why is 5G a problem in Mexico?

The rollout of 5G in Mexico is particularly hampered by strict regulations on annual rights to the use of communications frequencies. Annual royalty payments have generally risen above national inflation, resulting in low levels of foreign direct investment and telecommunications sector revenues being flat or declining.
