# Does Qatar have 5G base stations for communication

## Overview

---

Is there 5G network in Qatar?

Mobile phones in Qatar generally use 3G or 4G networks, but the 5G network is also available. Ooredoo was the first company to launch a commercial 5G network in Qatar. Currently, the network is mostly limited to parts of Doha, and both mobile phone providers in Qatar offer 5G plans.

What is Qatar's 5G spectrum plan?

This was updated in May 2022 to plan the allocation to both operators of additional spectrum in the C-band as well as high frequency (26 GHz) spectrum by 2023, while their license obligations require their 5G networks to cover 99% of Qatar with minimum download speeds of 100 Mbps by 2024.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

How has Qatar changed the face of Telecom?

We've changed the face of telecom in Qatar and can proudly say we have a wide range of services, thanks to our fixed and mobile networks. The Fiber Broadband and 5G networks were just the beginning. Constantly evolving we won't stop until we reach complete digitalization as the world's first truly Smart Nation.
