

# Does the 80KW inverter have 8 MPPTs

## Overview

---

The ASW80K-LT three phase inverter offers 80kW power rating with 8 MPPTs and 16 strings. How many MPPT's does a solar inverter have?

For a 16-panel solar PV system, a regular inverter might have 2 MPPTs. A Solar Edge system, however, has 16 MPPTs. This means that if, for example, one panel is shaded by a tree, cloud, or dirt, it will only affect the performance of the panels on that specific MPPT slightly.

How many MPPT inputs does a modern inverter have?

Most modern inverters are equipped with at least one MPPT input. The below article – which originally appeared as a response by Bradley Detjen to a question on Quora.com – explains MPPT using the most apt metaphor we've yet seen, so we thought it would be useful to share it with our readers.

What is solis-80k-5g-Pro 3 phase series inverter?

Solis-80K-5G-PRO 3-phase series inverter is a new generation of Solis 5G models, designed to provide high quality solutions for C&I PV projects.

What is a goodwe MT series inverter?

Input Voltage (V): Max. Input Current per MPPT (A): Max. Efficiency : The GoodWe MT series inverter is suited for medium and large-scale commercial rooftops and ground-mounted solar PV systems that need maximum versatility.
