What is an RV inverter?

The inverter is an electronic module that can power things that normally require 120VAC shore power (when not using a generator). Having an inverter is hugely convenient if you like to camp off the power grid but still want to watch TV or charge up your phone. Some mid- and high-end RVs come with inverters installed.

Does My RV have a 120 volt inverter?

In most cases, this means your RV may not have an inverter installed, or it has one that powers only specific circuits. To find out more about RV inverters, keep reading.

Does an RV need AC or DC power?

The DC system runs off energy stored in your RV's batteries and powers things like your lights and other smaller items. In contrast, your rig needs AC power to run systems like your air conditioner microwave, and traditional wall outlets. However, using AC power will require you to be plugged into shore power — unless you have an inverter.
