EU battery pack solar container lithium battery box

Overview

What is a lithium battery shipping box?

The lithium battery shipping boxes are suitable for non-certified batteries, prototypes, battery cells, battery modules and batteries in equipment. For increased part protection, the batteries are stored in layers using customised interior packaging solutions that are developed to safely hold dangerous goods.

Does Berlin Packaging offer un-certified packaging solutions for lithium batteries?

At Berlin Packaging we offer UN-Certified packaging solutions for lithium batteries, ensuring compliance with IATA, ADR, and IMDG regulations.

What is lithium ion battery packaging?

The lithium ion battery packaging utilises standard footprints designed to interface with customers' existing supply chains. Once batteries are removed at the assembly line, two-unit loads can fit together and packed into one lithium battery container, to reduce return shipping costs.

Can ionpak transport lithium-ion batteries safely?

The ORBIS IonPak is suitable to transport lithium-ion batteries safely. The UN approved packaging is certified for solid dangerous goods in a variety of different industries. With a robust outer packaging, customised interior packaging and dust cover, our lithium battery shipping boxes optimise product flow in industrial supply chains.
